Year Est: 1994
Lic. Architects: 6
Principal(s): Sherman Cawley, Paul Devers

LAST YEAR 1

Cawley Architects is a proponent of the cost-effective “design build” methodology of delivering projects. Cawley Architects is unique because it successfully partners with many contractors and clients to deliver commercial projects that represent the highest level of achievement in cost control, scheduling, architect/contractor collaboration and client satisfaction. In 2018, Cawley Architects participated in mixed-use, light industrial, distribution, office, healthcare, retail and restaurant projects totaling more than 2 million square feet.

COMPANY STRENGTHS: “Strengths that contributed to our No. 1 ranking include prioritizing the relationship over the transaction, overcoming the many shortcomings of traditional architectural services delivery, creating clean, crisp, cost conscience designs, providing responsiveness, and focusing on an error-free drawing package from our QA/QC department..”

IMPACT OF 2019 TRENDS: “Labor shortages in the industry will continue to create pressure in all areas of services and construction arenas, with commensurate wage increases. Commodity pricing will continue, with materials and tariff-related pricing leading the way. Additionally, increased interest rates will now enter into the market and put downward pressure on development.”
